The **Challenge** Every Department Faces

Digital evidence is growing faster than any department can manage manually

VIDIZMO is purpose-built for law enforcement, not adapted for it. Every workflow, compliance requirement, and deployment model is built around how public safety agencies operate.

How **VIDIZMO** Works for Your Agency

Connect your data

Every type of evidence your agency collects, including video, audio, images, and documents, connects to VIDIZMO in minutes.

It processes automatically

Every file is processed the moment it is connected. Video, audio, images, and documents are ready to answer your investigators' questions down to the frame and the word.

Ask what you need

Type a question in plain language across all your evidence. Get the answer with the exact source traced back to your evidence.

Get your output

Get cited answers your team can act on immediately. Share findings, flag evidence for redaction, or hand off to prosecutors without leaving the platform.

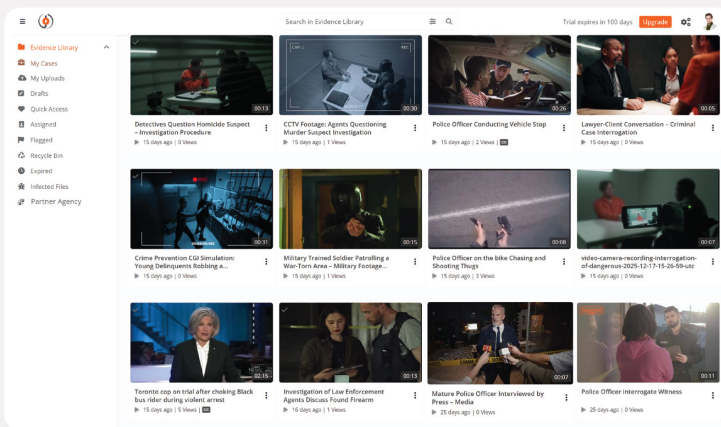

AI Solutions for Law Enforcement

Purpose-built AI to help law enforcement agencies investigate, protect, and serve with greater speed and accountability.

Digital Evidence Management

Every piece of evidence secured, tracked, and shared with confidence.

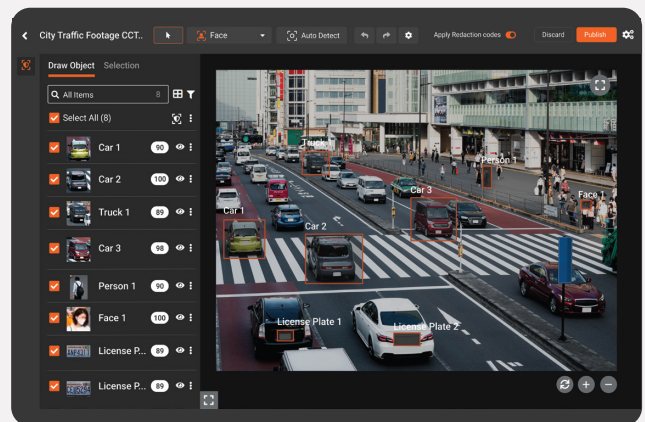

- Supports 255+ file formats including body cam and dash cam
- Secure sharing with partner agencies, prosecutors, and courts

Redactor

AI-driven redaction for Sunshine Law, evidence disclosure, & public accountability.

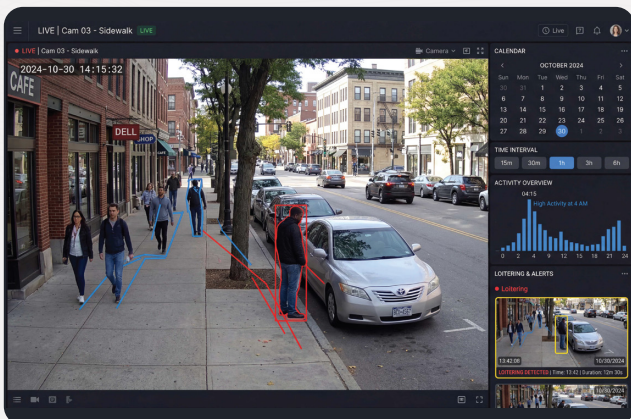

- Auto-detects and redacts 40+ PII categories across video, audio, and documents
- Bulk processing for high-volume Sunshine Law backlogs

Ai live Insight

Make your existing cameras intelligent. Detect threats in real time.

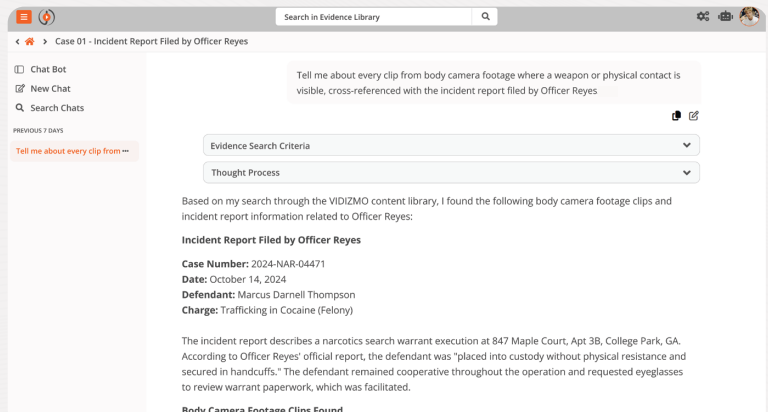

- Detects persons, vehicles, weapons, and license plates in real time
- Works on existing cameras via RTSP/ONVIF, no hardware replacement

AI Intelligence Hub

Accelerate investigations and act on digital evidence faster with AI

- Natural-language querying across video, audio, images, and documents
- Reduces hours of manual review to seconds of AI search
