

Engage Learners and Achieve Better Learning Outcomes

Deliver remote lectures and interactive tutorials that empower educators and inspire students—giving them all the resources they need to thrive.

Why Traditional Educational Efforts Are Falling Short

The educational landscape is evolving, but outdated methods create barriers to effective learning. Institutions face challenges such as:

- **Lack of Engagement**

Traditional videos and monotonous lectures fail to keep students engaged, leaving them zoning out before the critical concepts are absorbed.

- **Limited Resources**

Expanding quality education to all students across campuses feels impossible with limited budgets and resources.

- **Scattered Educational Resources**

Storing and managing educational videos like lecture recordings and how-to tutorials across different platforms can be a logistical nightmare.

- **Conflicting Learning Schedules**

Coordinating class sessions for students can be difficult when they are in different time zones.

- **Accessibility Barriers**

Remote learners, students with disabilities, or those with limited English proficiency struggle to access educational content in formats that suit their needs.

- **Insufficient Performance Tracking**

Institutions lack clear insights into how students engage with video content and how it impacts learning outcomes, making it difficult to track progress.

How VIDIZMO EnterpriseTube Drives Learning Success

VIDIZMO EnterpriseTube offers a comprehensive AI-powered solution to streamline and enhance the use of video in educational settings. Here's how:

● Boost Engagement with Interactive Videos

Embed quizzes, polls, and handouts directly into your educational videos to turn passive viewing into active learning.

● Store Resources in a Centralized Library

Simplify the management of educational content by securely storing, organizing, and categorizing multimedia content.

● Support Asynchronous Learning

Support students and faculty across time zones with on-demand video content that can be accessed at any time.

● Make Learning Accessible to All Students

Automatically transcribe and translate video content into 40+ languages to ensure accessible learning for every student.

● Track Learning Progress with Detailed Analytics

Get real-time insights on who's watching, how long they're watching, and where they're struggling so educators can adjust content and improve outcomes.

● Host Virtual Events and Webinars with Ease

Conduct live training sessions, virtual office hours, or webinars that reach students globally, no matter where they are.

● Search Videos Using AI

Find the exact moment or topic in a video by recognizing spoken words, keywords, topics, and tags.

● Create Content with Ease

Use the EnterpriseTube Content Creation tool to record your screen and webcam and make audio clearer with noise suppression.

● Simplify Complex Topics with AI

Break down long, complex videos into digestible chapters and generate automatic summaries using AI.

● Protect Student Privacy with Video Redaction

Automatically detect and redact sensitive information from videos to comply with data privacy regulations like FERPA and GDPR.

● Fully Brand Your Video Learning Platform

Customize the platform using your institution's logo, colors, fonts, and custom CSS to create a consistent learning environment for students and staff.

● Host SCORM Content

Upload SCORM content that is compatible with learning management systems (LMSs) to ensure a cohesive learning experience.
