

Protect Patient Data, Streamline Staff Training, and Ensure HIPAA Compliance

Engage your staff with interactive video training, educate your patients, and comply with HIPAA guidelines with the AI-powered secure video solution for healthcare.

The Pressing Challenges Healthcare Providers Face

Managing patient data securely and delivering top-notch care involves multiple pain points. Here's what's making harder than it should be:

● Keeping Patient Data Secure

Storing and securely sharing sensitive patient information in compliance with industry regulations is a top priority, but it's also a huge challenge.

● Training Healthcare Staff

Keeping medical staff up-to-date with procedures like patient care protocols is difficult to standardize across shifts and locations.

● Consuming Overwhelming Information

Watching long videos can be overwhelming for patients, creating disengagement and risking the patient's health.

● Ensuring HIPAA Compliance

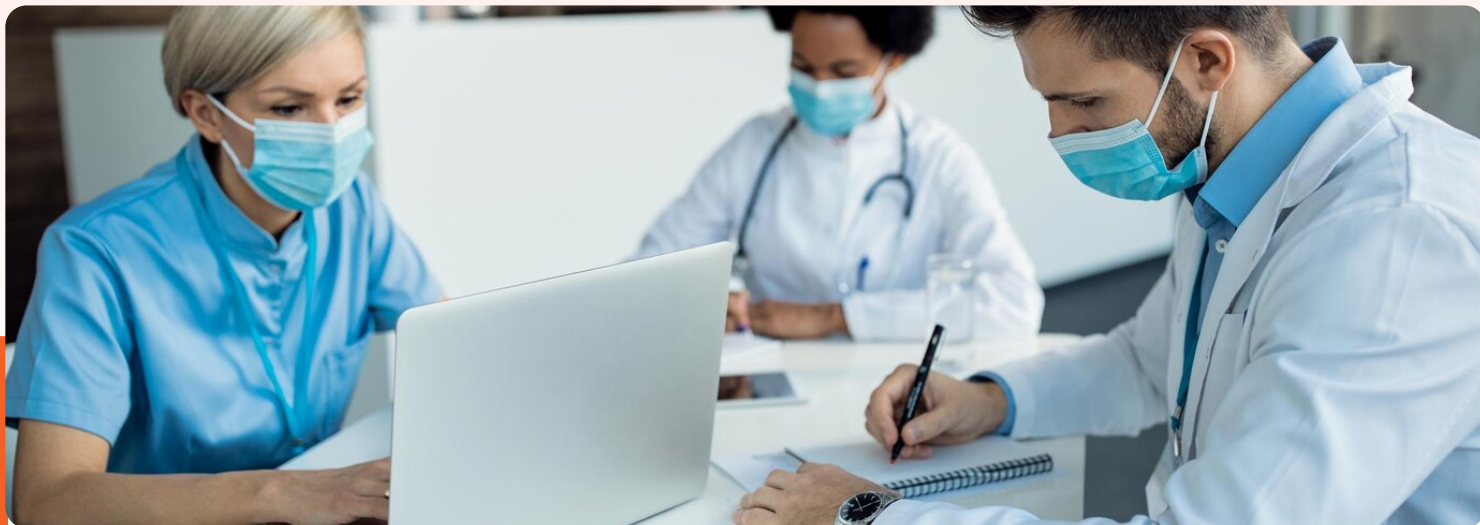

Complying with the HIPAA Privacy and Security Rules while using video for training and consultations is hard to manage due to wealth of information.

● Providing Aftercare Instructions

Ensuring patient aftercare compliance is critical to improving patient outcomes but providing consistent and accessible guidance is challenging.

How VIDIZMO EnterpriseTube Secures Healthcare Knowledge Sharing and Patient Information

The AI-powered, HIPAA-compliant video platform is built to make healthcare training, patient education, and compliance easier.

● Protect Patient Privacy

Protect sensitive patient information, including HIPAA identifiers, with encryption, multifactor authentication, role-based access control, etc.

● Streamline Staff Training

Host full-length surgery videos, continuing medical education (CME), or compliance training videos, ensuring staff stays current with the latest practices.

● Engage Medical and Paramedical Staff

Add quizzes to training videos to keep medical and paramedical staff, including doctors and nurses, engaged and measure their understanding in real-time.

● Add Summary and Chapters to Videos

Automatically summarize and add chapters using AI to break down complex videos, such as advanced surgical techniques, into manageable sections.

● Monitor Learning Progress

Track staff engagement, quiz results, and course completion statuses for critical training and automatically issue completion certificates.

● Create Healthcare Training Content

Take advantage of the EnterpriseTube Content Creation tool to build new training content with clear audio using noise suppression.

● Conduct Live Sessions

Live stream CME videos, healthcare webinars and events, and industry conferences that reach the global audience in real time.

● Comply with HIPAA

Remain strongly compliant with HIPAA regulations, including the HIPAA Privacy and Security Rules, using enterprise-grade security features.

● Transcribe and Translate Healthcare Videos

Use AI to transcribe and translate videos in 40+ languages and add closed captions (CC) to ensure everyone can access key content.

● Automate Redaction with AI

Use AI-powered redaction to protect sensitive information in patient consultation recordings, therapy sessions, audio recordings, insurance documents, etc.

● Customize Your Video Platform

Add your organization's logo, colors, fonts, and even apply custom CSS to create a fully branded, professional experience for the audience.

● Find Critical Information in Seconds

Find the specific video quickly with AI-powered search through automatically generated tags, spoken words, faceted search, objects and text in video, etc.
