

Eliminate Scheduling Conflicts and Maximize Engagement with AI-powered Manufacturing Video Training

Whether you're onboarding new employees or conducting safety drills, ensure that your manufacturing teams are equipped with the knowledge they need – anytime, anywhere.

Why Your Manufacturing Training is Hitting Roadblocks

You're not just running a training program. In fact, you're managing a production line of its own. And right now, it's being slowed down by:

- **Conflicting Schedules**

Different shifts mean getting everyone together in the same room at the same time for training is a logistical nightmare for you to deal with.

- **Disengaged Learners**

Traditional training videos like those on safety protocols bore your team to death, and they're checked out before the critical information sinks in.

- **Tight Budgets**

Repeating the same in-person training sessions over and over for new hires is not sustainable as it adds to employee training costs.

- **Overwhelming Information**

Complex topics like advanced machine operations overwhelm employees with too much content, giving them little time to fully grasp it.

- **Inconsistent Training**

Teams in different locations get different training, leading to inconsistent results. This, in turn, creates discrepancies in employee performance.

- **Surface-level Analytics**

Who's paying attention? Who's learning? Right now, you just don't know, and this is hurting the way you evaluate the performance of your employees.

- **Lack of Accessibility**

Remote workers and non-English speakers with limited English proficiency (LEP) struggle to access training materials when and where they need them.

How VIDIZMO EnterpriseTube Eliminates Manufacturing Training Bottlenecks

VIDIZMO EnterpriseTube is your go-to AI-powered solution for scalable, flexible, and accessible video training for manufacturing teams.

● Watch Anytime with On-demand Streaming

Let employees view crucial training videos in their own time so that it does not conflict with their work priorities.

● Make Videos Interactive to Boost Engagement

Embed quizzes, surveys, and handouts right into your videos to ensure that employees absorb the training content.

● Reuse Training Videos to Avoid Starting Over

Upload once and use them again and again, so you don't have to rearrange the training session as new employees arrive.

● Create Automatic Summaries and Chapters

Summarize and break down complex content into digestible sections using AI chaptering and summarization to prevent information overload.

● Secure Internal Knowledge

Securely host all your videos – from evacuation to calibration training – using custom security policies, multifactor authentication, etc.

● Track Progress Right Away

Monitor who's engaging, track quiz scores, and automatically issue course completion certificates to successful employees.

● Train Employees on the Go

Host live training sessions, virtual events, and educational webinars that reach across your global office locations with CDN.

● Make Content Accessible to All

Automatically transcribe and translate content in 40+ languages and add closed captions (CC) to ensure accessibility.

● Create Content with Ease

Use the EnterpriseTube Content Creation tool to record your screen and webcam and make audio clearer with noise suppression.

● Brand the Platform Your Way

Fully brand your manufacturing video training platform with your company's logo, colors, fonts, and custom CSS.

● Host SCORM Content

Upload SCORM content that is compatible with learning management systems (LMSs) to ensure a cohesive learning experience.

● Search Videos with AI

Search through training videos by automatically generated tags, topics, and even spoken words, quickly finding what you need.
