VIDIZMO Intelligence Hub
for *Public Safety*

Turn complex evidence into court-ready intelligence

An AI-powered investigation platform that helps public safety agencies search, analyze, and act on digital evidence at scale.

www.vidizmo.ai

VIDIZMO Intelligence Hub for public safety is a single, secure space where you can search, analyze, and act on digital evidence to connect the dots, without compromising the chain of custody or compliance.

Public Safety Intelligence Hub

Analyze evidence from the last 3 months to identify gang affiliations, communication patterns, and potential future meeting locations based on surveillance videos, phone logs, and social media captures.

Thought Process

VIDIZMO Intelligence Hub Analysis:

- **Identified Gang Network:** "The Iron Wolves" – 18 known members connected across 4 U.S. states.
- **Key Communication Hubs:** Most activity converges on two encrypted Telegram groups and a recurring phone number linked to an unknown suspect ("Subject X").
- **Meeting Prediction:** Based on geotagged posts and vehicle movement patterns, the system predicts a probable gathering on Oct 17, 2025, at a warehouse in East Dallas.
- **Visual Insight:** Heatmap visualization shows 78% of activity concentrated near two known drug distribution points.
- **Recommended Action:** Place surveillance teams near identified coordinates and cross-reference Subject X's number with federal watchlists.

What Makes it Different

Get Intelligence by Asking, Not Just Search

Stop wasting hours digging through videos, audio, and reports. Now you can ask a question in plain English and instantly find the right clip or transcript.

Security that Makes Evidence Court-ready

Keep every case defensible in court with built-in security using access controls, audit trails, and automated redaction. Protect your chain of custody from upload to trial.

Automation that Fits Your Workflow

Use the no-code Workflow Builder to automate repetitive evidence handling and analysis like generating routine evidence summaries or transcribing evidence.

Summarize What Happened

Skips hours of manual review. Get a clear picture of key events: who said what, when, and where, so detectives can focus on analysis, not playback.

Build Timelines that Reveal the Story

Automatically build complete case timelines that reveal connections you might otherwise miss. See the full story in minutes, not hours.

How It Drives Your Mission

Redact Sensitive Content in a Few Clicks

Protect identities, guard private data, and stay compliant with laws like FOIA, without exporting evidence to third-party tools.
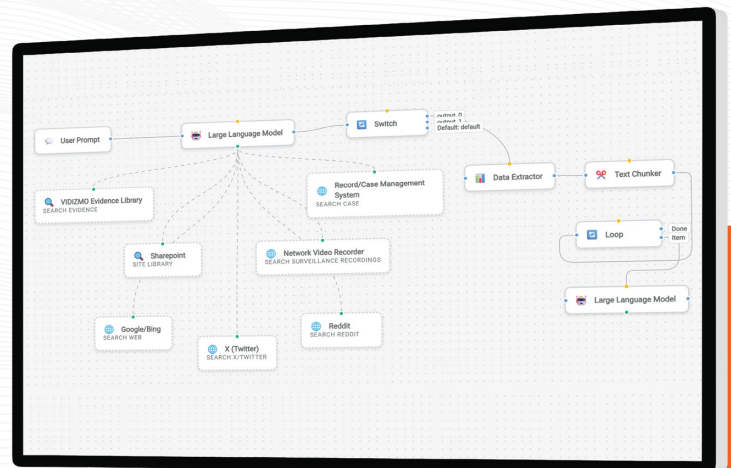

Generate Police Reports in Minutes

Turn raw evidence into structured, shareable reports that fit standard investigative formats, without copying text between ten different systems.

Automate, Don't Administrate

Use the Workflow Builder to define rules once then let the system handle the busywork, from evidence summarization to generating timelines and reports.
